		GEN	ERAL INFORMATION	PERTAINING TO WATER RIC ater rights in California. They	GHTS IN CALIFORNIA	ative rights
		mere are two princ	ipai types oi suriace w	ater rigilis in Galifornia. They	are riparian and approprie	

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same

watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

•		GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA
		CETATE HAI OLIMATIONAL FLAMMING TO ANY FLAMOUS OF A OFFICIAL OLIVANA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A <u>riparian right</u> enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system

An <u>appropriative right</u> is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALLEORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A <u>riparian right</u> enables an owner of land bordering a natural lake or stream to take and use waterion his riparian land. Riparian land must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An <u>appropriative right</u> is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

Riparian land must be in the same watershed as the water source and must never have been severed from the of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a rip water user must share the water supply with other riparian users. Riparian rights may be used to divert the nature of a stream but may not be used to store water for later use or to divert water which originates in a different water or return flows from use of groundwater. An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropring the may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriates are required to obtain a permit and license from the State. Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The first statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a rappropriation upstream from their diversion, and (3) assists the State to determine if additional water is available future appropriators. The above discussion is provided for general information. For more specific information concerning water rights contact an attorney or write to this office. We have several pamphlets available. They include: "Statements of Water Diversion and Use"

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A <u>riparian right</u> enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An <u>appropriative right</u> is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"

"Information Pertaining to Water Rights in California"

"Water Rights for Stockponds Constructed Prior to 1969"

"Appropriation of Water in California"

STATE OF CALIFORNIA THE RESOURCES AGENCY STATE WATER RIGHTS BOARD

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water. Glesses S. Wright	
Address Box 15 Manton, Colif	
B. Name of body of water at point of diversion Cany on Crack	<u></u>
B. Name of body of water at point of diversion Cancy on Crack Tributary to Rock Crack Thence N. FK Bottle	G-col
C. Place of diversion 50 N, Range 2.	(= , 19. Q. B&M,
Shasto County, or locate it on sketch of section grid on reverse side with	regard to section lines or
prominent local landmarks.	
D. Name of works None	
E. Capacity of diversion works / 0	cubic feet per second
Capacity of storage reservoir	gallons acre-feet
State quantity of water used each month in gallons or acre-feet	
Year Jan. Feb. Mar. Apr. May June July Aug. Sept. Oct.	Total Nov. Dec. Annual
: : : : : 5: /0: /0: /0: /0: 5	: : 50
If monthly and annual use are not known, check months in which water was used. State extended	to creek nt of use in units, such as
acres of each crop irrigated, average number of persons served, number of stock watered, etc Pasture 7 ± acres	
Maximum annual water use in recent years 50 ±	e dilung
Minimum annual water use in recent years. 50 ±	acre-rect
Type of diversion facility: gravityX, pump	acre-feet
Method of measurement: weir, flume, electric power meter, water met	ter, estimate
F. Purpose of use (what water is being used for) 1719 at 100 and Stack	•
	• • •
G. General description or location of place of use (use sketch of section grid on reverse side if ye	pu desire)
H. Year of first use as nearly as known Since 1926 in Wright family	Previous ormen
Test John Wright, Joe Lee Irngated for man. 1. Name of person filing statement Glenn S. Wing At	y years prior to 1
I. Name of person filing statement Glenn Se Wing At	· · · · · · · · · · · · · · · · · · ·
PositionOrganization	····· ·i···
Address ,	
I certify that the foregoing statements are tripping correct to the best of my knowledge and belief.	1/15/
